The image shows nine identical white plastic pipe fittings, each with a stainless steel flange, arranged on a blue surface. A cardboard box is visible in the background. The fittings are arranged in a roughly circular pattern, with one in the center and eight around it. The blue surface appears to be a metal table or workbench. The cardboard box is brown and is partially open, showing its interior. The fittings are made of a white, opaque plastic material and have a standard pipe thread on the inside. The stainless steel flanges are polished and have a standard bolt hole pattern. The overall scene suggests a product display or a batch of components ready for assembly.
